What is USCoin?

- USCoin (USCOIN) is an open source, anonymous peer-to-peer anonymous cryptocurrency created based on the Binance Smart Chain Coin. USCoin is a global investment network that is fully decentralized without central authorities which enable people to store and invest their wealth in a digital currency based on the Binance Smart Chain.
- USCoin is a deflationary token, in that for every milestone reached, a certain number of tokens will be removed from circulation, thus increasing the token's value.
- 5% of every buy or sell transaction will be automatically redistributed to all existing USCoin holders, this is our way to reward our investors and early adopters.

TOKENOMICS

01

LONG-TERM INVESTMENT

5% of every transaction will be automatically redistributed to all existing USCoin holders. The longer you hold USCoin the more you will earn. This is our way of rewarding our investors and early adopters.

02

STABILITY

5% of every transaction will be moved into our liquidity pool to create stability for USCoin and prevent major liquidity issues in the future, a common issue that many tokens/coins suffer from.

03

MILESTONE TOKEN BURNING EVENTS

As we grow and acquire more holders, we will be burning large amounts of tokens to reduce the supply of USCoin and thus increase its value.

Milestone Burning Specifications

Token Symbol		USCOIN

Future projects

USCoin will be releasing an exclusive American themed NFT collection. 51 individual variations will be minted and sold with first dibs going to our token holders. A large portion of initial proceeds will go back into marketing and building our next project.

The team behind USCoin will begin building an NFT marketplace for creating, buying and selling NFT artwork. We plan on having a crowd share feature allowing certain high valued NFT's to be sold and owned fractionally by multiple investors. Users will be able to buy/own/sell a % of high value NFT's. Our goal is to make NFT's more accessible to users who otherwise would not be able to afford an entire NFT. Our platform will also allow for anyone to create and mint new NFT's. Creators will be able to select the price and number of “shares” for each NFT created.

Marketing Strategy

We will partner with crypto influencers across all platforms, press releases and sponsored news articles, sponsored posts inside social media groups and channels, crypto-specific banner ads and sponsored content, and targeted ads via Twitter, Reddit and TikTok.
